

A range of Options & Accessories to enhance the operation & appearance of your A5000 Platform Lift

Communications

- Telephone

Carriage mounted hand held telephone to provide communication from the platform.

- Intercom

Carriage mounted intercom system to provide communication between the platform and remote receiver.

- Autodialler

Carriage mounted autodialler to dial pre-programmed telephone numbers when operated via the emergency alarm button on the platform.

Locking and Security Systems

- School key locking

Key locking system automatically locks the doors until the key is used to activate the landing push button to call the lift.

- Smart Card

Programmable smart card can be used to restrict access to certain floors only.

Power door operators

The landing doors can be power operated to automatically open on arrival at each floor or by using the remote push buttons on the landings to aid access onto the platform. Recommended when the landing doors are located within a lobby area to aid access.

RAL powder coat finishes

The doors and shaft panels can be powder coated from a range of full gloss RAL colours to enhance the appearance of the lift from the standard white RAL 9016.

Shaft ceiling with automatic LED lighting

The standard basic fluorescent light fitting can be replaced by elegant LED spot lights recessed into the shaft ceiling.

Fold down seat

A fold up seat can be fitted to the carriage to add additional user comfort.

Glazed shaft panels

Replace the standard white RAL 9016 shaft panels with toughened laminated glass to create an attractive scenic lift with additional natural light.

A7000 Premium Model

Upgrade your lift to the premium A7000 model which includes a full height 2.2m side wall on the platform with integrated control panel, mirror and LED lighting above, all providing additional user comfort.

Indicators

Digital position indicators can be provided on the platform and/or landings.

Soft start and stop

A frequency converter can be fitted to the drive system to allow the platform to smoothly accelerate to full lift speed and then decelerate into each landing giving a smooth ride between floors.

Battery Emergency Lowering

Battery back up can be provided to facilitate the lowering of the platform in the event of an emergency.

500kg Up-rated load

If additional load carrying capacity is required the rated load of the lift can be increased to 500kg.
